

## GOVERNANCE: WITH INSTRUCTIONS Public Logic TL;DR Overview

THE PROBLEM: We hire people to run the country... and then stop checking if they did. Bills are unreadable. Votes are suppressed. Corruption is legal if you fill out the form. And we're asked to "just trust the system"—even when the system refuses to show its work.

THE SOLUTION: Governance: With Instructions turns government into an accountable job. Public scorecards. One-issue bills. Verified donations. Measurable outcomes. It's not politics. It's operations—with receipts.

### 10 CORE FIXES:

1. Civic Scorecards – Every public official gets a stats page: votes, attendance, impact.
2. Plain-Language Legislation – Every bill must be understandable by a GED-level reader.
3. One-Issue Bills – No more hiding tax breaks inside school funding.
4. Verified Public Donations Only – No PACs. No dark money. All receipts public.
5. Performance-Based Pay – Bonuses tied to outcomes, not headlines.
6. Civic Integrity Panel – Independent enforcement of behavior, transparency, and fraud checks.
7. Open Voting Access – 7-day voting window, universal ID acceptance, and opt-out registration.
8. "Lunch on U.S." Voter Incentive – Free meal voucher with your ballot. Democracy tastes better.
9. Legacy-Based Compensation – Long-term bonuses paid post-term based on real impact.
10. Public Search Dashboards – Anyone can look up any official, bill, or vote—no lawyer required.

IMPACT SNAPSHOT: Based on AI projection models...

- In 5 years: Turnout rises. Trust begins to rebuild. Corruption drops.
- In 10 years: Party loyalty weakens. Scorecards go viral. Bad actors get exposed.
- In 20 years: The U.S. becomes the global standard for transparent governance.

THE LOGIC: We already track our athletes. Let's track our lawmakers. If you're paid by the people, the people get to see your stats. Show your work—or get replaced.
