

THE PEOPLE'S CODE – TL;DR OVERVIEW

Public Logic: Law, Now With Instructions

THE PROBLEM:

Our justice system is inconsistent, biased, profit-driven, and unreadable. Laws vary by zip code. Sentences are unpredictable. Evidence is hidden. Judges and prosecutors operate with limited oversight. And most people don't understand the rules they're supposed to follow.

THE SOLUTION:

The People's Code standardizes law across the nation. A logic-based legal system: - Tiered structure for constitutional rights, statutes, and local rules - Mandatory explanation for all verdicts and sentences - Transparent evidence processing and post-trial public access - Equal access to defense through a national Public Defender Corps - Centralized oversight via rotating Civic Review Panels - Professional, paid jurors via the National Jury Corps

No loopholes. No mystery justice. No punishment for profit. Just logic.

10 CORE SHIFTS UNDER THE PEOPLE'S CODE:

1. **National Legal Floor** – Same minimum protections, everywhere. States can go further—not backwards.
 2. **Plain-Language Law** – No legalese. If you can't read the rule, it's not valid.
 3. **Transparent Verdicts** – Jury decisions and judge sentences require reasoning—always.
 4. **Equal Evidence Access** – Both sides use the same system (UEPE). No gatekeeping.
 5. **No Private Prisons** – Public safety, not profit, becomes the incentive.
 6. **Restorative First** – Default nonviolent offenses to rehab and restitution, not incarceration.
 7. **Civic Oversight** – All laws must pass logic, fairness, clarity, and math.
 8. **Public Verdict Archive** – Searchable case outcomes build trust and spot bias.
 9. **Jury Corps Compensation** – Pay people to show up, learn, and serve justice.
 10. **Justice That Pays for Itself** – The system is funded by the 20/30 Plan and saves billions by design.
-

IMPACT SNAPSHOT:

Based on Public Logic simulation modeling... - **In 5 years:** Retrials drop. Sentencing stabilizes. Legal literacy improves. - **In 10 years:** Wrongful convictions decrease. Community-level trust rebounds. - **In 20 years:** America becomes the benchmark for logic-based law. Justice regains its purpose.

THE LOGIC:

We don't just prosecute crime. We understand it. We don't just issue sentences. We explain them. And we don't just expect people to follow the law—we give them a system they can actually read.

**JUSTICE SHOULDN'T REQUIRE A LAWYER.
IT SHOULD REQUIRE LOGIC.**
