

## THE PEOPLE'S CODE - IMPACT REPORT

*Redefining Law. Restoring Trust. Resetting Power.*

---

### Impact on Citizens

#### Understandable Law

Every person can read and comprehend the laws that govern them. No legalese. No ambiguity. Just logic and clarity.

#### Equal Defense Access

Public Defender Corps ensures your rights don't depend on your income. Every citizen gets competent, funded legal support.

#### Verdict Transparency

Jury and judge explanations become the norm. People know *why* outcomes happen—not just what they are.

#### Freedom from the Fine Print

No more getting buried in clauses or overcharged because you didn't understand the process. Law becomes readable.

#### Community Repair First

Nonviolent offenses trigger restorative solutions before punishment. Fair outcomes, not punitive reflexes.

#### Earned Accountability

Everyone faces the same system, regardless of wealth or title. Justice becomes proportional, not performative.

---

### ⚖️ Impact on Judges, Lawyers & Juries

#### Standardized Sentencing

Consistent outcomes across geography and demographics. "Same crime, same result."

#### Less Courtroom Chaos

Unified evidence handling (UEPE) streamlines pretrial processes and removes evidence suppression games.

#### Public Archive of Rulings

Each decision contributes to a national record of legal reasoning. Biases become detectable. Accountability grows.

#### Modern Civic Jury Corps

Service is professional, compensated, and trained. Jurors are prepared—and proud—to serve.

### **Fewer Appeals, Fewer Mistrials**

When logic is built in, fewer rulings break under scrutiny. Trust in verdicts rises.

---

## **Impact on the Legal System**

### **\$25B Fully Funded by 20/30 Tax Plan**

Not a penny comes from added burden. Justice reform is funded through clarity and efficiency, not extra taxes.

### **Prison Population Declines**

By removing profit incentives and defaulting to restorative paths, incarceration becomes rare—not routine.

### **Public Oversight Becomes the Standard**

Rotating Civic Panels review laws and rulings. Laws failing logic or fairness tests get rewritten, not weaponized.

### **State-by-State Consistency**

Minimum national standards guarantee equal protection under law. No more life-changing zip code lottery.

### **Legal Illiteracy Ends**

By teaching law in school, using public dashboards, and ditching jargon, every person becomes legally literate.

---

## **Impact on Government**

### **Public Confidence Returns**

People understand the system, see it working, and feel respected by its outcomes. Trust rebounds.

### **Fewer Wrongful Convictions**

With universal defense access, transparent evidence handling, and standardized review, the errors shrink.

### **Budget Predictability**

Transparent tracking, lower retrial rates, and steady funding improve federal and state budgeting.

### **Smarter Legislation**

New laws must pass Public Logic scoring. If it fails on logic, clarity, fairness, or cost? It doesn't get passed.

### **The End of Judicial Guesswork**

Sentencing and verdicts now require reasoning. "Because I said so" is no longer admissible.

---

### **Together, The People's Code does not just reform justice.**

It rebuilds a nation's trust in the idea that law can serve everyone.

**Justice, Now With Instructions.**
