CARE: Comprehensive American Rights to Essentials
Public Logic TL;DR Overview

THE PROBLEM:
Healthcare in America is broken. Families go bankrupt for cancer treatment. Doctors burn out under billing codes. Insurance companies profit from denial. We spend the most—and trust the system the least.

THE SOLUTION:
CARE replaces the profit-first insurance model with a cost-based national infrastructure. No billing games. No network traps. One system. Everyone in. Built on logic. Priced by reality. Powered by dignity.

---

10 CORE SHIFTS UNDER CARE: 1. **Access for All:** No eligibility games. If you're in the U.S., you're in. 2. **Flat Monthly Cost:** ~$770/adult covers everything. No co-pays, no deductibles. 3. **No More Insurance Middlemen:** The profit layer is removed entirely. 4. **Keep Your Doctor:** Every provider is in the system. Your care doesn't change—just the backend. 5. **Cure Over Profit:** Research funds go toward curing, not milking. 6. **Mental Health = Real Health:** Covered fully, tracked seriously, prioritized systemwide. 7. **Performance Pay for Providers:** Bonuses for great care—not upselling. 8. **Built-in Fraud Prevention:** Patient co-verification, audit trails, and real-time feedback. 9. **Emergency-Ready Infrastructure:** PHC teams, mobile clinics, and rural access units. 10. **The CARE App:** Tracks usage, shows costs, logs outcomes, and empowers people.

IMPACT SNAPSHOT (AI Projection Engine): - **In 5 years:** Millions more get care. Burnout drops. Rural hospitals stabilize. - **In 10 years:** Chronic illness rates decline. Life expectancy rises. Systemwide cost drops. - **In 20 years:** U.S. leads in cures. Healthcare becomes our most trusted public institution.

THE LOGIC:
We already pay more—for less. CARE flips that. It's not socialized medicine. It's streamlined infrastructure. This isn't just coverage. It's a cure for a dysfunctional model.

HEALTHCARE IS HOW WE PROTECT EACH OTHER.
Let's stop protecting the system that breaks us.
